ABOUT

Software Engineer with over 6 years building scalable digital products across healthcare, finance, e-commerce, fitness, and education. I design and deliver high-performance applications focused on clean architecture, maintainability, and measurable business impact. Experienced working with distributed teams across India, the US, and the UK, and LATAM.

My background spans mobile, frontend, and backend engineering, using technologies such as Flutter, Dart, React Native, React, Golang, TypeScript, AWS, Python and FastAPI. I apply principles like Clean Architecture, DDD, and TDD to build resilient systems, integrating complex features including biometrics, geolocation, WebSockets, and platform-level capabilities. Comfortable operating in modular environments (monorepo or multirepo), I focus on scalable system design, performance optimization, and delivering reliable products from concept to production.

Based in Spain with legal work authorization.

SKILLS

- Languages/Frameworks: Flutter, Dart, React/React Native, TypeScript, SwiftUI, Swift, iOS, Golang, Python, FastAPI
- State Management: Riverpod, Provider, BLoC/Cubit, GetX, MobX, Redux
- Tests: Unitary, Widgets, Integration, Golden Tests, Mockito, Mocktail, Jest
- Architecture: Clean Architecture, BDD, DDD, TDD, MVM, MVC
- CI/CD: Codemagic, Bitrise, GitHub Actions, Jenkins
- Mobile Payments: Stripe, RevenueCat, In-App Purchase, Shopify
- Others: GraphQL, FlutterFlow, Firebase, Supabase, Shorebird, AWS, Sentry, PostgreSQL

EXPERIENCES

Software Engineer **World Wide Technology** **April 2025 - Present**
Remote

- Rebuilt Voomp Play from FlutterFlow MVP to full Flutter codebase, boosting app performance by ~45% and cutting crash rate in half.
- Introduced modular “micro-apps” architecture, enabling new feature rollout 40% faster across squads.

Fullstack Engineer **BTG Pactual Bank** **Aug 2022 - April 2025**
Remote, United Kingdom

- Built and integrated the Offshore Banking module, contributing to a product adopted by +50k high-net-worth clients.
- Increased bill payment conversion by 26% through UX improvements, auto-approve flows and smart defaults.
- Improved banking app stability, cutting crash rate by 30% and boosting App Store rating from 3.9 to 4.6.

Software Engineer **Unimed** **Jan 2022 - Jul 2022**
Remote

- Scaled the “Unimed Rio Preto” medical app to +100k active doctors, improving load time by 35% with an architecture refactor.
- Created a reusable design system adopted by 3 product teams, cutting development time of new features by 40%.
- Implemented biometric login and secure data access, reducing login friction and increasing daily active users by 22%.

Mobile Developer

[Likin.do](https://www.likin.do)

Oct 2020 - Dec 2021

Remote

- Built core features (product listing, checkout, onboarding) for a social-impact marketplace, boosting buyer conversions by 22%.
 - Mentored team in Clean Architecture and GetX, reducing production bugs by 30%.
- Implemented Firebase analytics + crash reporting, cutting issue resolution time from days to hours.

Software Engineer

[Genial Investments Bank](https://www.genialinvestmentsbank.com)

Dec 2019 - Sep 2020

Remote

- Built and optimized the stock order (“boleto”) feature used by +1M investors, reducing trade execution time by 25%.
- Developed white-label banking apps for brands like Flamengo BRB and TC, accelerating rollout from 3 months to 4 weeks.
- Introduced app flavors and micro-frontends, reducing maintenance complexity and enabling 5 parallel custom banking apps.

Software Engineer

[Hospital Israelita Albert Einstein](https://www.hospitalisraelita.com.br)

Mar 2019 - Nov 2019

Remote

- Improved medical app performance for +5k physicians, reducing exam report loading time by 40%.
- Launched “Exam Results PDF download” feature, adopted by 90% of active users within the first month.
- Reduced critical crashes by 30% through refactor and BLoC/Cubit state management.

Web Developer

[L'Oréal](https://www.lorealparis.com)

Jun 2018 - Feb 2019

Remote

- Built interactive in-store kiosks for 14+ luxury brands, increasing customer product engagement by 60%.
- Developed quiz-based recommendation system that generated 20k+ product samples/month in Sephora stores.
- Reduced kiosk maintenance time by 50% using reusable Flutter Web modules and Firebase-based analytics.

Software Engineer

[Logon Computing](https://www.logoncomputing.com)

Jan 2018 - May 2018

Remote

- Developed a health inspection app for city agents, replacing paper forms and increasing field productivity by 50%.
- Implemented offline data sync with SQLite, enabling 100% functionality in low-connectivity areas.
- Reduced manual report processing time from 3 days to a few hours via digital data submission.

Languages

- English (C1)
- Portuguese (C2) (Native)
- Spanish (B2)

Education

- Information Technology, IFPB, Brazil

2019 – 2023
